CableMaster 200

The CableMaster 200 is an economic, compact continuity and wiring tester for Ethernet cabling. Its ergonomic design makes this handheld tester easy and efficient to use. Its large LCD display shows the results in the form of icons and messages that are easy to understand. It is a basic tool and a must-have for any installer and repair technician.

Parameter	Specifictations
Dimensions	120 mm x 55 mm x 25 mm
Weight	90 g with battery and remote unit
Power supply	4 x LR44 button cell (V = 6) included
Overvoltage protection	66 Vdc, 55 Vac

The CableMaster 200 tests Ethernet cabling for opens, shorts, split pairs and miswires – simply by pressing a button.

As a unique feature in its class the CableMaster 200 provides built-in tone generation for convenient cable tracing and port identification using the appropriate tone tracer probe (see optional accessories).

The CableMaster 200 contains a removable remote unit and RJ45 remote identifiers (1-5) for testing long cable lengths

Design features

› Support of 5 remote identifiers

› Display of cable faults according to TIA 568 specifications

› Removable remote unit enables testing long cable distances

› Testing of cables up to 304 m / 998 ft

› Tone generator can be used for cable tracking with a tone probe (optional accessories) turn

› Clear LCD display with all test information, including PASS/FAIL display

› Very easy operation

› Compact size
